"It's going to happen because I'm going to make it happen."

Summary

I am a motivated and ambitious student with a strong background in both back-end and front-end programming. I have a preference for back-end development and have gained valuable experience in this area. Throughout my academic journey, I have actively taken on leadership roles, successfully leading teams during various semesters. I possess excellent problem-solving skills and am open to exploring alternative solutions. I have a thirst for knowledge and continuously seek opportunities to expand my skills. I am eager to find a position that offers room for growth and development in all aspects of my career. Additionally, I excel in making decisive decisions when faced with unexpected challenges.
